Company Radio Plus Fond du Lac Wisconsin

Forcing radio stations to set up studios with operations from within their city of license would be the end to many broadcasters. In a day of increased competition from satellite radio, internet, cable TV - - -constructing a studio "in the city of license" is a waste of money. As a 25 year radio veteran, I do not see how this would positively impact that community. Radio is about WHERE THE SIGNAL GOES...not where it originates from. When the day comes you force broadcasters to pack up and reset just to "be in the city of license..." will also be the day you send them packing for good. Please, do not turn the clock back to the 1960's - - -

Radio companies serve many communities in AND around their city of license...
